Full Stack Developer with experience in building scalable, production-grade web applications. Proficient in **frontend** development, backend **API** design, database systems, and deployment. Focused on writing clean, maintainable code and delivering reliable, high-performance software in collaborative environments.

Experience

IIFA Degree Institute, Bengaluru

Full Stack Designer & Developer

Aug 2026 – Currently working

- **Designed and optimized** SQL tables, indexes and wrote efficient aggregate queries By effectively leveraging Claude Ai.
- **Integrated** AI-powered file tagging using Redis job queues for asynchronous processing, enabling smart file search & categorization.

Foxconn Hon Hai Technology, Bengaluru

Full Stack Developer

Jan 2024 – Aug 2026

- **Designed** and implemented a scalable event management system supporting 1000+ users with Role based access control.
- **Developed and maintained scalable REST APIs** using Node.js and Express.js supporting high-performance web applications.
- Optimized database performances using MongoDB indexing strategies, reducing query latency by ~30%

Projects

E-Commerce Web

- **Architected a RESTful e-commerce API**(Node.js/Express +SQLite) with 7 resource modules(users, products, categories, inventory, orders, payments, stats), supporting full CRUD and relational integrity via foreign keys and cascading deletes.
- **Engineering atomic order-processing transactions** handling stock validation, inventory deduction, price snapshotting, and payment creation in single DB transaction-preventing overselling and ensuring data consistency under concurrent requests.

Personal Cloud Storage

React.js, Tailwind CSS, Express.js, MongoDB

- **Developed** a secure cloud storage application with user authentication (JWT) and role-based file access controls.
- **Implemented** file upload, rename, delete, and share features using Node.js, Express, MongoDB, and Multer.
- **Integrated** AI-powered file tagging using Redis job queues for asynchronous processing, enabling smart file search & categorization.
- **Deployed** backend on Railway and frontend on Vercel with CORS-configured API communication. [Hyperlink](#)
